August 25, 2010

Dear Mr. A.G. Kawamura,

We are in support of establishing to floor the all milk price in California, at \$14.50 per hundred wt. We are in desperate need of help for our dairy business to succeed in the future. Our cost to break even is currently \$15.00, and the talk of current corn prices is going to make that break even much higher. Our cows need to be fed everyday & milked everyday; we can not just shut them down with an off switch. Please understand the need in our industry for this price protection. We need the California Department of Food and Agriculture to help us to keep feeding our cows when we experience these low, low prices again! Thank you for your time.

Sincerely,

A handwritten signature in cursive script that reads "Dana Koetsier".

Dana Koetsier
